**PRICE, HALF-A-GUINEA.**

# PREFACE.

IN submitting the following Tables for the approval and general use of Underwriters and Insurance Brokers, attention is respectfully drawn to the undermentioned explanatory remarks, viz. :—

TABLE 1—Shows the Gross Premium, and is calculated as between Merchant and Broker, giving the latter the full benefit of any fraction.

TABLE 2—Shows the Gross Premium, less 5 per Cent. Brokerage, and is calculated as between Underwriter and Broker, giving the latter the benefit of any fraction up to $\cdot 0\frac{1}{2}^{d.}$ inclusive, which in account makes it as fair for the one as for the other, the Brokerage being deducted according to Scale No. 1 at page 84.

TABLE 3—Shows the Gross Premium, less 5 per Cent. Brokerage and 10 per Cent. Discount, the latter being deducted according to Scale No. 2, at page 85.

In the lower rates of percentages,

where the premium amounts to a less sum than fivepence, no deduction whatever is made, it being only fair that the Underwriter, who accepts the risk of the odd pounds, should receive the odd pence for so doing, otherwise he would be taking a risk (small in amount, it is true), without any premium whatever for it.

If the following Tables be brought into general use by both Underwriters and Insurance Brokers, the Compiler feels confident that a vast amount of time and trouble will in future be saved, not only in book-keeping, but also in agreeing Underwriter's accounts.
